EVENT INFORMATION

Numerous surveys have shown that employers are anxious to adopt new virtual solutions to keep their employees safe and healthy. Healthy Business Group (HBG) provides employers with a broad selection of innovative healthcare services to meet their unique business objectives. HBG programs positively affect the total cost of care, provide a valued employee experience, and allow employer-specific configuration – all on one platform.

We are dedicated to being a leader in the creation and design for health plans of the future by effectively incorporating digital therapeutics into the existing healthcare ecosystem for both our clients and our partners.

SPEAKER INFORMATION

Jason Hansen is the Chief Operating Officer at Healthy Business Group (HBG) with responsibility for client management, health innovation, finance and operations. As a member of HBG's management team, Jason is passionate about closing gaps in the lack of healthcare programs available to mid-market companies due to their size and budgets. Prior to joining HBG, Jason was a management consultant within Deloitte's Strategy and Operations practice. During his time with Deloitte, he focused on helping Fortune 500 financial services and healthcare organizations with process improvement and operating model transformation initiatives.

Jason holds a bachelor's degree in Business Administration from the University of Delaware and an MBA in Financial Management from Pace University.
